Intel Corporate Non Disclosure Agreement

Source-specific experimental reconstruction for conv_1369fc5a95fd; no authentic signature, certificate, or original PDF bytes.

Agreement identity CNDA reference: cnda091197. Template revision recorded in the export: Rev. 4/29/2016. Effective date recorded in the export: May 21, 2026. Parties: Intel Corporation (Intel) and Bold Quest Technology Co., Ltd. (Participant). Participant representative: yanbin zhang, VP. Participant location: Shanghai, Pudong, China; its full postal address was not exported. Reconstruction notice The original PDF was not supplied. This document reconstructs input facts and numbered contractual provisions specifically described in the same group of exported conversations. Connecting wording and clauses not quoted in full are experimental drafting. It includes no assessment, negotiation recommendation, risk rating, or proposed amended agreement. No genuine signature or certificate is reproduced.

1 Definitions

1.1 Affiliate means an entity that controls, is controlled by, or is under common control with a party. Control means ownership of more than fifty percent of the voting interests. Covered Persons means a party's and its Affiliates' employees, temporary workers, and professional advisers who require access for the Purpose. 1.2 Confidential Information means information disclosed by one party to the other in tangible, electronic, oral, visual or other form that bears a confidentiality legend, or that does not bear such a legend if the receiving party knew, or reasonably should have known under the circumstances, that the information was confidential. It may include technical designs, specifications, business plans, research materials, and information exchanged during discussions related to the Purpose.

2 Purpose and contacts

The parties may exchange Confidential Information to discuss a prospective business or technical relationship (Purpose). The particular transaction or collaboration project is not specified in the exported material and is not added here. Intel contact recorded in the export: Yixin Fu. Intel contact email was described as present in the source form, but its actual value was not exported; the phone field was blank. Participant contact: yanbin zhang, VP. Contact email and phone values are not reconstructed.

Confidentiality obligations and exceptions

Source-specific experimental reconstruction for conv_1369fc5a95fd; no authentic signature, certificate, or original PDF bytes.

3 Protection and permitted disclosure

3.1 The receiving party shall use Confidential Information solely for the Purpose, protect it with reasonable care, and limit disclosure to Covered Persons who need to know it for the Purpose and are bound to protect it. The receiving party shall not disclose Confidential Information to another person without the disclosing party's written permission except as this Agreement permits. 3.2 Each party will be liable for breaches of this Agreement by its Affiliates and Covered Persons. The receiving party shall notify the disclosing party promptly after learning of unauthorized access, use or disclosure and cooperate with steps reasonably necessary to address that incident. The notification and cooperation wording is experimental connective drafting.

4 Duration of obligations

The confidentiality obligations for each item of Confidential Information continue for five years after the receiving party receives that item. Termination of this Agreement does not shorten the applicable five-year period for information already received. This reconstructed text does not decide whether a statutory duty concerning a trade secret applies after that period.

5 Exceptions

The receiving party's obligations do not apply to information that the receiving party can demonstrate:

5.1 is publicly available through no breach of this Agreement;

5.2 was rightfully known to the receiving party before its receipt from the disclosing party; 5.3 was rightfully received from a third party without an obligation of confidentiality; or 5.4 was independently developed by Covered Persons without use of the disclosing party's Confidential Information. The exceptions are reconstructed from the described source provisions. No evidence about Participant's actual development activity is supplied.

6 Disclosure required by law

A receiving party may disclose information to the extent required by applicable law or a valid court or governmental order. If legally permitted, it shall give the disclosing party reasonable notice and cooperate in seeking confidential treatment. This section provides experimental connective wording; it is not a quotation of an unexported original clause.

Termination and general provisions

Source-specific experimental reconstruction for conv_1369fc5a95fd; no authentic signature, certificate, or original PDF bytes.

7 Termination return and destruction

Either party may terminate this Agreement at any time without cause by giving notice to the other party. Neither party is obligated to disclose any Confidential Information to the other. On the disclosing party's request, the receiving party must promptly return or destroy Confidential Information and copies in its possession or control and certify in writing its compliance. Obligations that remain within their applicable term survive termination. This reconstruction does not add an archival-copy exemption or a liability ceiling that the export did not describe.

8 General provisions

8.1 The parties are independent contracting parties. This Agreement does not create a partnership, joint venture, employment relationship, agency, purchase commitment, or obligation to enter another transaction. 8.2 In this Agreement, neither party grants to the other party any license under any patents, copyrights, trademarks, or mask works, either expressly, by implication, inducement, estoppel, or otherwise. Ownership of information and of intellectual property remains with its owner. 8.3 A change to this Agreement shall be recorded in a writing signed by authorized representatives of both parties. A failure to enforce a provision on one occasion does not by itself waive the right to enforce that provision on another occasion. The clause number and connective wording of 8.3 are synthetic, as its original wording was not exported. Unspecified terms The exported descriptions did not provide a monetary consideration, purchase price, project delivery schedule, insurance arrangement, damages cap, or a separately signed business agreement. None is invented here. The reconstructed agreement contains the described confidentiality provisions rather than a service or technology-evaluation fee contract.

Governing law warranties and execution

Source-specific experimental reconstruction for conv_1369fc5a95fd; no authentic signature, certificate, or original PDF bytes.

8.4 Governing law and courts

All disputes arising out of or relating to this Agreement will be governed by the laws of the United States of America and the State of Delaware, without regard to conflicts-of-law provisions. Such disputes may be brought in the courts of the State of Delaware or the Federal courts sitting in that State. This submission to jurisdiction is non-exclusive.

8.5 Entire agreement and other signed agreements

This Agreement states the confidentiality agreement of the parties concerning the Purpose. It will not supersede any other signed, written agreements between the parties, including without limitation non-disclosure agreements. No other actual signed agreement was exported or supplied.

8.6 No warranties

The disclosing party disclaims all warranties for all Confidential Information, including without limitation all warranties about the accuracy or utility of that information. Information is provided as is. This provision applies to each party when it acts as disclosing party.

8.7 Electronic execution

Neither party will contest the enforceability of this Agreement on the basis that it was executed electronically. No authentic signature image is reproduced. The source-specific historical description is recorded below. Participant execution block Bold Quest Technology Co., Ltd. Name: yanbin zhang Title: VP Signature image: unavailable; not reproduced Historical AI described signing date: May 24, 2026 (not externally verified) Intel execution block Intel Corporation Historical AI described signatory: Greg Ernst, chief revenue officer and sales general manager Signature image: unavailable; not reproduced Historical AI described signing date: May 24, 2026 (not externally verified)

Historical signing description — source-specific experimental input

This page describes what the paired historical AI in conv_1369fc5a95fd said about its input document. It is not a DocuSign completion certificate, a genuine signed agreement, or a verification of the historical AI statement.

Agreement: Intel Corporate Nondisclosure Agreement, CNDA cnda091197.
Parties described in the source: Intel Corporation and Bold Quest Technology Co., Ltd.
Effective date described in the source: May 21, 2026.
Signing method described in the source: DocuSign electronic signature.
Signing date described in the source: May 24, 2026.
Participant signatory described in the source: yanbin zhang, VP.
Intel signatory described in the source: Greg Ernst, chief revenue officer and sales general manager.
Intel contact described in the source: Yixin Fu; contact email values are not restored.

Source boundary: the original PDF, signature images, envelope identifier, completion certificate, audit timestamps, and cryptographic verification were not provided. This reconstruction records the described signed state without asserting an authentic signature or inventing original certificate fields. Unknown personal and corporate fields remain unknown.

Why this input differs from the common risk-review reconstruction: that other source described an unsigned sent/viewed state. Its fifth-page unsigned ledger and unsigned participant value are not suitable for this source. This source-specific input retains the contractual clauses, removes that different source's unsigned state, and supplies only the signing description specifically reported here. No analysis, risk judgment, negotiation recommendation, or expected final answer is included.
